---

THE design of the following work is to furnish young persons with an easy Guide to Spelling, and to combine utility with cheapness. In treating the subject, the Author has not only been attentive to the usual classification of words according to alphabetical order and their number of syllables ; but he has likewise taken care to arrange the words in separate divisions, according to their respective modes of accentuation, which he considers as an additional and very material improvement ; as the uncertainty of placing the accent, which appears to be the most general difficulty to the young scholar in pronouncing his language, is successfully obviated by this method of arrangement.

As an additional help to ascertain the proper pronunciation of particular words, the equivocal sounds of the letters *c*, *s*, and *g*, are carefully distinguished in an easy and compendious method. Thus the learner will ob-

serve that the letter *ç*, with this mark annexed to it always bears a soft sound like the letter *s*, as in *çell* (*sell*;) and if marked thus, *ç*, it is sounded like *ts*, as in *çhaff* (*tshaff*;) \*s denotes the sound of *z*, as in *wi<sup>s</sup>ce* (*wise*;) 'g represents the sound of *j*, as in 'gem (*gem*;) and *ç* with the cedille affixed has a similar sound. When such marks are not affixed to these letters, they must be understood to retain their natural and more general sound, as in the words *call*, *house*, *get*. It must be observed, likewise, that in words where *h* is printed in the Italic character, it is not aspirated; and wherever any other letter occurs in that character, its sound is dropped. A circumflex over a vowel denotes a *long* sound, as in *bôlt*.\* Where difficulties or irregularities arise, which cannot be thus easily obviated, the scholar is referred to the bottom of the page for a correct pronunciation. The plan itself is doubtless extremely simple. But when the circumstances of those for whom it is professedly designed are considered, this simplicity itself will probably be esteemed a recommendation.

The Author regards the rapid circulation of the preceding editions of this little work as bearing testimony of an extensive approbation among the educators of youth; and he flatters himself that this approbation is founded on a general experience of its utility for the purposes which it professes to serve.

---

\* For the explanation of single accent ' and double accent " the learner is referred to page 140.

The authorities here principally followed, with regard to orthography, accentuation, and the occasional documents of pronunciation, are the Dictionaries of Johnson, Webster, Walker, Sheridan, and Bailey. As to the explanatory matter, that of Webster and Bailey, with some exceptions, has been selected; but where a concise or satisfactory exposition of a word could not be obtained, the Author has introduced one of his own

To the spelling lessons he has added a few particulars necessary for the learner to be acquainted with; such as, a Table of Grammatical Terms, with their Marks and Explanations; another Table of the Contractions or Abbreviations commonly used in print or in writing.

He has likewise subjoined a catalogue of words apparently synonymous; but which are distinguished on a closer view, sometimes by minute, and sometimes by very striking shades of difference. It is not pretended that the distinct significations of these apparent synonymes are ascertained in every instance with etymological propriety or critical exactness. They are frequently exhibited merely according to their popular acceptance, and in a manner which, it is hoped, is accommodated to the ideas and capacities of those persons for whose use the book is particularly intended.

And to render it more unexceptionable to youth of

both sexes, the greatest care has been taken to omit words of an impure and immoral tendency; as the minds of youth cannot be too circumspectly guarded against the admission of improper ideas.

On the whole, therefore, it has been his ardent endeavour to render the *Scholar's Spelling Assistant* as extensively useful as the prescribed limits of the undertaking would permit; and no less acceptable to teachers, than to those for whom it is peculiarly appropriated

An Ellipsis supplies the place of a letter or letters in a word, when the writer does not choose to write the word at length ; as, J——s T——ms——n, James Thomson.

Asterisks \*\*\* are sometimes used for the same purpose.

A Hyphen is used to part syllables ; as, Ab-ba.

A Parenthesis serves to include a sentence in the body of another ; as, This act of cruelty (for such it certainly was) is almost the only stain in the character of, &c.

A Quotation " signifies the words so marked are transcribed from the writings of another in his own words. The end of a Quotation is marked thus, " and shows that the passage quoted is finished.

Single Accent denotes the stress to be laid on a particular syllable in a word.

Double Accent serves to mark a short sound in a syllable.

Crotchets enclose short sentences or references, that have no connexion with the subject treated of.

An Asterisk,	} Are all used as references to the bottom of the page or margin of a book.
An Index,	
An Obelisk	
and	
$\Delta$ Parallel,	} Figures, also as 1, 2, 3, &c. are used in like manner, and have, in general, the same signification.

*N. B.*—A Paragraph ¶ and Section § are not always used like the other marks, as references to the margin or bottom of a page. They are chiefly used to mark the divisions and separate the heads of a discourse. The former character is to be met with in many parts of the Old and New Testaments, and in Locke's Essay, this mark § is prefixed to the Sections of the discourse.

*Contractions used in writing and print (but it is to be remembered that except in Addresses and accounts, such Contractions in the body of a letter are improper.)*
